## WHY THERMOGRAPHY?

- Detects indication of breast disease ten years prior to a mammogram!
- FDA approved, 100% safe, non-invasive thermal imaging
- Safe and accurate reading of dense breasts and breasts with implants
- No harmful radiation and no compression of the breasts

Pain and contact free! Providing women with a healthy and intelligent alternative for the health of their breasts.

This procedure empowers women to make decisions at the earliest moment possible and to take a pro-active approach to their health through nutrition, hormone balancing and health detoxification.
